Ahmed Sharaf

Full-Stack Django Developer & Data Analyst | Building Robust Web Apps & Analyzing Data to Drive Results
Cairo, Egypt

Summary

I'm a Python developer for 3 years, I've written a lot of code using oop and Data Structure.
I will put all these codes on this GitHub account on this Link : https://github.com/Ahmed-Sharaf-Mohammed
I Studied Data Analytics and could use python on it, also i have some information about business Metrics.
I have high skills in the following

Building administrative applications on Excel or Access, through which data can be entered and reports can be printed.

Data analysis on Power BI, Tableau.

Analyzing data from different sources on VS 2019 using integration services.

I am proficient in using all MS Office 2019 programs.

I can build applications and websites from scratch using Python Django and create databases using SQL.

I can build "Unity" 2D & 3D applications that work on desktop, Android, or IOS.

Good at managing and securing networks and analyzing signals on Linux."

Education

Helwan University Cairo
3, Computer Science · (2019 - 2023)
